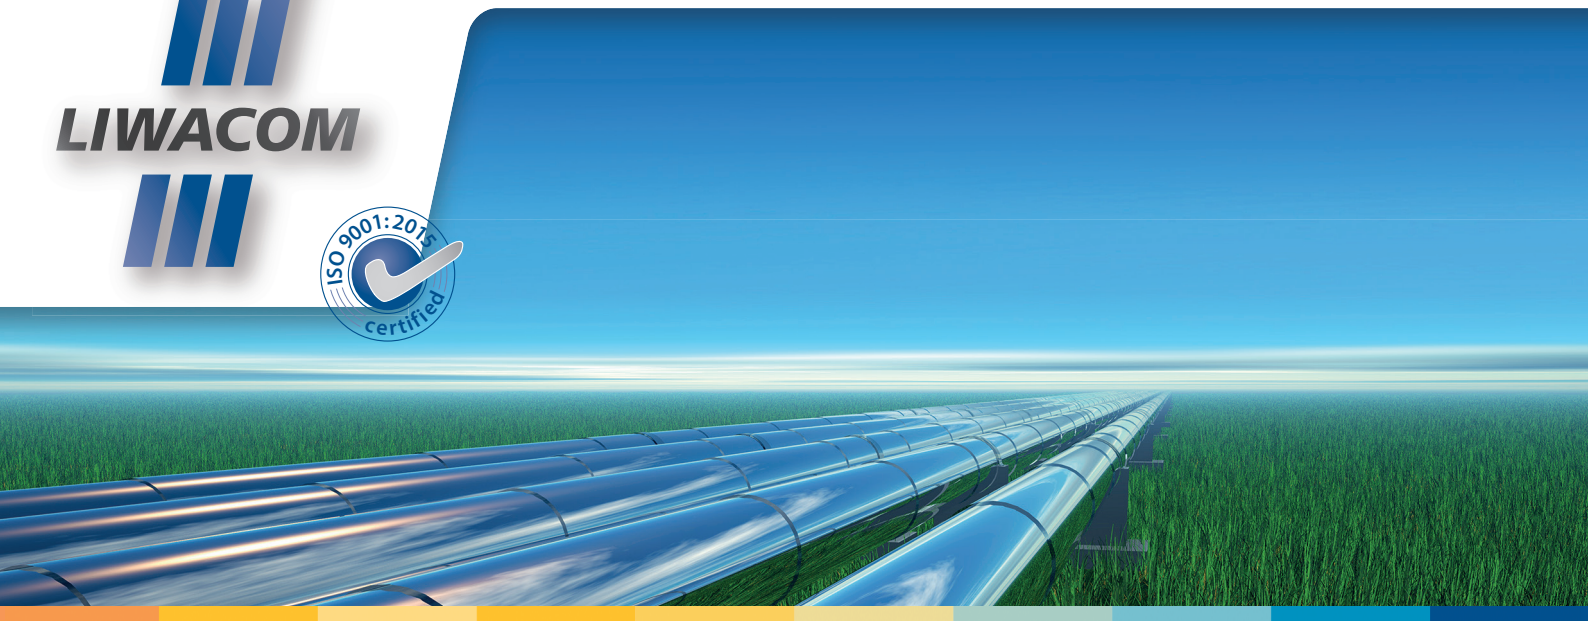
LIWACOM

ISO 9001:2015 certified



Pipeline Simulation is Our Mission

LIWACOM is the leading global supplier of pipeline application software.

Our expertise

The excellence in customer satisfaction and quality creation are the cornerstones of our success. Our customers benefit from almost three decades of sustained and focused commitment to the pipeline industry.

With this background LIWACOM supports the operation of energy efficient and safe gas networks in

- Engineering
- Network design verifications
- Implementation
- Customized training
- Advanced maintenance
- Enduring product development

All our experience has resulted in our product

SIMONE
SOFTWARE
Simulation and Optimization on Networks

SIMONE Software

By using SIMONE*, numerous leaders in the pipeline industry ensure the operation of their transmission and distribution networks. Our billing application is approved by German Bureau of Standards for use in commercial transactions.

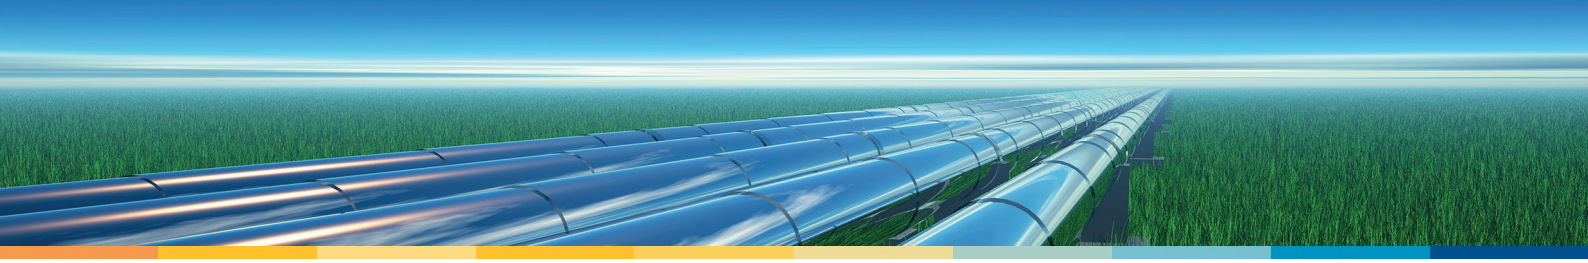
The seamlessly integrated standard package supports

- Real-time simulation
- Leak detection and location
- Gas quality reconstruction for billing purposes
- Compressor fuel optimization
- Capacity determination
- System design

and many more applications.

Its product standardization is unique and covers all applications, computer platforms and customized installations.

* SIMONE is a joint product of LIWACOM and SIMONE Research Group.



Companies at all stages of the natural gas supply chain, industrial gas system operators, consultant engineers and major IT system integrators all rely on LIWACOM products and services, e.g.:
